

## MASTER FITTER ASSESSMENT – LAMINATE

### OVERVIEW OF PRACTICAL ASSESSMENT

Applicant will be required to correctly apply smoothing compound to an area of approximately 4m<sup>2</sup>.

Applicant will be required to install laminate/floating wood to an area of approximately 5m<sup>2</sup>. The area will incorporate a low level radiator, fireplace, W/C and two service pipes. The area must be treated as a 'live installation'. All relevant pre-installation checks must be observed.

The applicant must treat the subfloor as if it is of a solid construction (concrete).

The applicant must install planks across the room (side to side).

Applicant will be required to bring with them all tools necessary to complete the installation, (to include all PPS and safety equipment).

All materials will be provided, however, applicant may supply own materials at the discretion of the assessor.

Applicant must also demonstrate their ability to perform a board replacement.
